

Corrugated steel Slimline water tanks

Available from the Freeman Group, New Zealand's largest family-owned roof and rainwater products manufacturer.

Made by Kiwis for Kiwis

Water storage is no longer out of reach for people with small or difficult to access properties.

The iconic corrugated steel of our locally made tanks is not only fire resistant, but will seamlessly fit into almost any space.

And after a long and useful life, our tanks can be completely recycled. They are good for you and great for the environment.

Future-proof your home

The impact of climate change will alter your water needs.

The likely impact of climate change will include higher temperatures and extreme weather events.

Droughts

Longer summers with higher temperatures and lower rainfall are likely to reduce soil moisture and groundwater supplies.

Drought intensity will likely increase over time. Drier conditions in some areas are likely to be coupled with more frequent droughts. River flows are likely to be lower in summer and higher in winter.*

Floods

A change in rainfall patterns with increased summer rainfall in the north and east of the North Island and increased winter rainfall in many parts of the South Island is likely to cause flooding.*

Our tanks will retain water during times of drought as well as detaining water during heavy rainfall to facilitate its slow release to the stormwater system.

Our water tanks can be used to both slow the release of water (detention), or store water (retention).

Detention tanks

Intense rainfall can overwhelm Council stormwater networks', resulting in flooding and contamination. Stormwater detention tanks are designed to slow the release of water from your roof through a tank.

Most Councils now require all new developments and house extensions to have detention tanks. It's wise to check with your local Council before starting your project.

Retention tanks

Rainwater is a great source of water for your garden and can also be used in your home for laundry and toilets. The principle is simple, rainwater is collected from your roof and stored in a tank until you need it.

Rainwater retention tanks reduce water consumption, saving you money.

with a steel water tank

Our slimline tanks are designed to fit perfectly into your space and lifestyle.

Built for narrow spaces, our slimline tanks fit nicely along the side of your home.

Slimline tanks

Slimline tanks save precious space and maximise the amount of water you can capture. Available in popular colours and sizes, slimline tanks maximise water storage in tight spaces.

Our internal stainless steel cross-bracing is engineered into the tank for both strength and durability, with our slimline tanks available in 1,000, 2,000, 3,000 and 5,000 litre sizes. Larger tanks up to 10,000 litres are available on request.

The Slimline tank is the only style stocked in the South Island. The tanks below can be ordered, but have a longer lead-time.

Modline tanks

Our Modline range has flat ends, creating a smaller footprint than our slimline tank.

Round tanks

Round tanks are ideal for properties where space and access isn't an issue.

Square tanks

Available in a range of popular colours and sizes, square tanks are cost effective.

Kiwi made water tanks using high quality Bluescope Steel. Made to work with your space for a perfect fit.

Choose your colour

Our tanks are available in popular colours, from traditional galvanised steel to a range of fashionable Colorbond® colours, the choice is yours.

The Colorbond® steel colour swatches below have been reproduced to represent actual product colours as accurately as possible. However varying light conditions and limitations of the printing process may affect colour tones. Please visit one of our branches to view samples before deciding on the colour of your water tank.

**Note: Colorbond® colours are available as genuine or painted colours. NZ Colorsteel® colours are a close, but not exact match to Colorbond® colours.*

Slimline tanks

Slimline corrugated rainwater tanks come with a corrosion and construction warranty.

Slimline tanks are a great choice for tight spaces, allowing you to maximise your water storage capacity within the area available.

The most popular sizes of Slimline tanks are stocked right here in the South Island.

The specifications of our most popular Slimline tank sizes are listed below. If you need a larger size, rainwater tanks of up to 10,000 litres are available on request.

1,000 litres	2,000 litres	3,000 litres	5,000 litres
Width: 0.55 Length: 1.90 Height: 1.00 Weight: 45kg	Width: 0.70 Length: 2.0 Height: 1.5 Weight: 65kg	Width: 0.80 Length: 2.00 Height: 2.00 Weight: 90kg	Width: 1.10 Length: 2.50 Height: 2.00 Weight: 110kg
168 toilet flushes 1 hour of hand watering 12 washing machine loads	336 toilet flushes 2 hours of hand watering 25 washing machine loads	509 toilet flushes 3 hours of hand watering 38 washing machine loads	839 toilet flushes 5 hours of hand watering 62 washing machine loads

Inlet
400mm inlet strainer with light guard in tank lid.

Outlet
25mm zinc outlet with watermarked brass ball valve fitted to the tank.

Overflow
100mm overflow with mosquito screen fitted to the tank wall.

Water pump
Pump not included. Please contact Davy Pumps for information.

Inlets	Outlets	Overflows	Positions
2 x 400mm inlet strainers with light guards.	1 x 25mm fitted outlet with watermarked ball valve.	2 x 100mm fitted overflows with mosquito screen.	All of our tanks come with pre-fitted fittings and accessories.

Freeman Group

When it comes to water, it's important to get things right. That's where we come in.

Our water tanks are low maintenance, fire resistant and fully recyclable. Plus they come with a twenty year corrosion and ten year manufacturing warranty.*
